

our mini guide to using...

bio washroom cleaner

cleaning method

Manual cleaning: apply a small amount to a damp cloth and wipe surface. For heavy cleaning spray directly onto surface, leave to stand and wipe clean. For larger surface areas such as floors, use a mop and bucket.

Scale reduction: pour 20ml (neat concentrate) per night into urinals, sinks, etc.

Pipe and drain line cleaning: to enhance the microbial activity throughout the plumbing and drain lines pour 20ml (neat concentrate) per night into drain system. Alternatively, dispose of used mop water into drains.

dilution guide

General cleaning: dilute 1 part concentrate to 25 parts water (30ml per 750ml).

Odour reduction: dilute 1 part concentrate to up to 25 parts water (30ml per 750ml) or use at full strength. Adjust strength to achieve optimum fragrance level.

Proper dosage saves cost and minimises environmental impact: Delphis Eco encourage users to reduce waste going to land fill by re-filling empty trigger bottles with Bio Washroom Cleaner concentrate. Use the above dilution ratios for best results.

main use

COSHH

Non hazardous

health and safety

Use only as directed. Do not mix different cleaners. Seek medical attention if in discomfort or if any symptoms persist.

Eye Contact: Avoid contact with eyes, if product gets into eyes, rinse with water.

Skin Contact: Avoid contact with skin, if product gets onto skin wash with water and remove any contaminated clothing.

Ingestion: Do not drink, if swallowed drinking water may be beneficial, do not induce vomiting.

Inhalation: Avoid inhaling product, move to fresh air if in discomfort.

COSHH: Not classified as hazardous.

don't forget PPE...

Always wear the correct protective clothing if required. For best results we recommend using the correct dosing and colour coded microfibre cloths - please ask your manager for details.

how to dispose...

Dirty, used washing solution should be disposed of via drains that lead only to foul sewers. Do not allow detergent solutions to contaminate surface water drains. In the event that concentrated product should need to be disposed of, run small amounts to foul waste, diluting with plenty of water. For larger quantities, seek advice on disposal from the local authorities. Delphis Eco products are packed in fully recyclable containers. Empty containers should be rinsed thoroughly, the washings being run to foul waste. The containers may then be sent for recycling. Dispose of all waste in a responsible manner. Be aware of the environment.
